BS(CS) - PMAS Arid Agriculture University Rawalpindi - **2019**

I'm a Lead Web Developer with **6 years** of experience in building modern, user-friendly websites and web applications. I enjoy solving problems, and helping businesses grow through clean, efficient code and smart development practices.

Lead Developer (MERN, Astro, WordPress, Shopify) | Website & Plugin Specialist

LEED Pakistan | Sep 2022 - Current

Leed is a product/project based company with teams in Canada, Germany, and Pakistan. I worked as a developer for this company, building custom websites and plugins using WordPress, MERN, Astro, and Shopify, handling both frontend and backend tasks, converting Figma designs into fully functional websites, and resolving critical bugs across various projects.

Key Projects:

- Developed a property listing portal with website and backend APIs for agents and agencies using the MERN stack.
- Developed a website in Astro for a Shopify app that allows customizing shopify checkout rules.
- Built a custom registration plugin for a UK-based driving course website with integrated PayPal payments.
- Developed an OTP verification plugin using Twilio for mobile number validation, featuring a frontend popup for verification and admin settings for API keys and verification status.
- Developed a custom Stripe plugin with configurable shortcodes to generate dynamic payment buttons.
- Developed a chatbot dashboard using HTML/CSS/Bootstrap.

WordPress Plugin Developer, WooCommerce Specialist

Eniture (us based) | Dec 2021 - Aug 2022

Eniture is a product based company in which there are more than 25 plugins that are based on shipping prices calculation according to carriers in the US and they have more than 1600 customers. My key responsibilities are the implementation of new features in plugins with the team as directed by the company and also handle customer queries that are relevant to plugins and sometimes customize plugins according to customer demands. Plugins are available on [WordPress Plugin Directory](#).

Lead Developer (WordPress, Laravel) | WordPress Website, Plugin & Theme Specialist

Codistan | Jan 2021 - Nov 2021

Worked as a Lead Developer handling Laravel and WordPress projects, focusing on custom APIs, notification systems, and WordPress plugin and theme development from scratch, along with fixing bugs and adding custom functionality in existing themes and plugins.

Key Projects:

- Implemented notifications in Laravel project (SMS via Twilio, push via OneSignal, web via Pusher) and also develop API's for that project.
- Built a WordPress plugin to filter WooCommerce orders by shop manager area.
- Developed a plugin to convert WooCommerce product prices from GBP to PKR using live rates.
- Developed a plugin to send order confirmation messages to WooCommerce website customers.

Laravel, WordPress Frontend & Plugin Developer

Mindwhiz | Aug 2019 - Dec 2020

Worked as a Laravel and WordPress Developer, responsible for building custom APIs, WordPress plugins, frontend dashboards, and complete websites from scratch, including portfolio, eCommerce, and blog sites, as well as scraping websites for the company.

Key Projects:

- Developed a project with 100+ mobile app APIs in Laravel and a dashboard using HTML, CSS, and Bootstrap.
- Developed a custom WordPress quotation plugin for bookings, calculating rates based on start/end locations, booking type, and room count, using MapBox APIs for distance and location data.
- Developed a WordPress plugin to place pin markers on a world map based on clicked location tabs, displaying corresponding marker information.

WordPress Website Developer

B4U Group | Feb 2019 - July 2019

My key responsibilities are the working on WordPress sites frontend in which mostly included portfolio, ecommerce and blog sites. I developed more than 40 sites in that company.
